Development

## Provide online tools and platforms to enhance the networking among FETPs

### Project Information

- ◆ Department: Center of Excellence for Applied Epidemiology
- ◆ Unit: Knowledge Exchange and Networking

### OBJECTIVES

The purpose from this activity is to offer spaces and initiatives to the target group that enable them to share experience and lessons learnt while applying the online approach in the target countries. In addition, the platform will host regular webinars for technical discussions about the public health and field epidemiology activities and interventions in the countries.

### BENEFICIARIES

FETP residents, graduates, alumni, advisors, and directors in all targeted countries.

### REGIONS OF WORK

The project will target Bangladesh, Egypt, Morocco, Sudan, Tunisia, Iraq, Oman, and Yemen.

### PROJECT PHASES

The project will be divided into multiple phases. In each phase, GHD|EMPHNET will create a concept note, get it approved, create an action plan and timeline, and measure progress.

GHD|EMPHNET will technically support the newly established intermediate FETPs in the five countries: Bangladesh, Egypt, Morocco, Sudan, and Tunisia. Furthermore, the countries with the online Basic FETP, Iraq, Oman, and Yemen, will be added to this project as well. This will comprise several projects:

1. Establishing a webinar series for FETPs, this will be a monthly session bringing together four FETP residents, or public health professionals as speakers or facilitators. Each session will cover a different theme relevant to FETP work and interests.
  2. Creating an E-library with a space for FETP residents and graduates to share their work. This is a free resource.
  3. Empowering FETPs to create their own newsletters, within a project targeting the five countries as a start. This project entails training them on basic communication skills, writing skills, taking photos via mobile, and newsletter design. We will also provide tips and feedback. Moreover, from each program we will train a resident advisor and resident from each program, and for continuity and increasing capacities of the FETPs we will ask them to repeat the training each year for new residents.
- GHD|EMPHNET will launch and update the alumni association as well to be a space for graduates to enjoy continued learning experiences and foster exchange of knowledge.
  - GHD|EMPHNET will also develop the online networking platform where FETP residents and graduates can interact.

<b>Project Start and End Date</b>	<b>10/01/2020 – 09/30/2023</b>
<b>Partner Organizations</b>	<b>Centers for Disease Control and Prevention (CDC)</b>
<b>Funded by</b>	<b>Centers for Disease Control and Prevention (CDC)</b>
<b>Collaborators</b>	<b>FETPs in each country</b>

## What's next . . .

The expected outcome will be:

1. Establishing an FETP webinar series.
2. Ten FETP residents and resident advisors will be trained on communication skills.
3. Establishing an E-library
4. Establishing the EMPHNET FETP Ambassador program
5. Establishing the FETP Alumni Association

### By the Numbers

**23**

webinar  
sessions

**12**

FETP  
newsletters  
published

**1**

Alumni  
Association  
established

**1**

E-library  
established

**17**

Residents and  
graduates  
received  
training

**GHD|EMPHNET Information:** Global health Development (GHD) works at achieving its mission by responding to public health needs with deliberate efforts that allow for health promotion and disease prevention.
